

METERED UTILITIES PLUS

Your advanced resource for handling sophisticated and complex utility billing.

Simplified utility billing that integrates seamlessly with Rent Manager®. This easy-to-use advanced utility billing module processes metered utilities in states and communities that require special calculations.

Create multiple utility suppliers and meters, identify which units qualify for special discounts, while eliminating the need to manually calculate or estimate utility charges, and putting an end to monthly billing service fees.

State Guidelines and Blended Rates

Metered Utilities Plus accommodates the unique meter reading guidelines of several states in the United States. The module offers **blended rates for frequent rate changes**.

Detailed Utility Breakdowns

Let your tenants **see precisely how their total cost was calculated** with a utility breakdown at the bottom of your statements. Always stay up-to-date on your properties by reading meters via your mobile device using rmAppSuite Pro.

Eliminate Second-Guessing

Advanced calculations **take the guesswork out of metered utilities** and are another example of how Rent Manager is designed to custom fit any property, any size, and any location.

Tackle complex
utility billing with
Metered Utilities Plus.
